Insert all the floppy's in your devices that you want to store on your local drive. And then run FloppyCopy1.1x86x64.exe. Then follow the instructions on the screen.

-----  
---Error message/Program not working---

The program will start if used on the operations systems it was made for.  
If you get minor bugs like:

cant find a, b, f, g, h device

(Program is only made for a,b,e,f,g,h floppy's)  
Solution: (Change your floppy drive to a,b,f,g,h)

Cant create folder.

Solution: (You don't have system administrator rights to make a folder on C: drive)

folder all ready exist!

Solution: (You all ready have a folder named c:\floppy)

Out of memory.

(If you get this error you are running Windows95/98.)  
Solution: (Try instal service packs then run the program again.)

Error reading floppy drive.

(The floppy disk have bad sectors)  
Solution: (change the floppy disk/repair it with scandisk.)

The program did not erase all files on my floppy disk

Only root files from floppy disk was erased.  
(Auto Floppy Copy cant erase folders.)
