

Part 1: Introduction

Interface Tour

Inspector Bar

The Inspector Bar is where you go to change attributes associated with either the selected item in the Organizer, or selected figures within the current idea space.

Organizer

Your Curio project can contain hundreds of idea spaces and documents all neatly organized here in the Organizer.

Toolbar

The Toolbar contains the primary controls for working within Curio.

Navigator

Here you can quickly jump to any location in your project, or step through the idea spaces one-by-one. Notice some buttons change if Command or Option is pressed.

Idea Space

What you're looking at is an Idea Space. It's like a special piece of paper that can contain figures, images, movies, songs, text, files, PDFs, live WebViews, lists, mind maps, tables, index cards, sketches... anything!

The Shelf

You can't see it now but there's a handy utility Shelf available here. We'll discuss this in detail later.
