Database Schema

Field Name	Type	Definition
ZIPCode	char(5)	ZIP stands for "Zoning Information Plan". It is used to signify a delivery route in the United States as designated by the USPS. In most cases a ZIP Code is a geographic region with a center point.
CityName	varchar(64)	The name of the city (and in some cases, organization) designated by that ZIP Code or postal code.
StateAbbr	char(2)	A state code or abbreviation is a two character designation for that state - for example, California is CA and Texas is TX, etc.
