Modifications in V1.00(AARO.2) | 02/16/2015

1. [Bug Fix][eITS-141200042] After disable/enable 2.4G and 5G Wi-Fi scheduling, only 2.4G wake up.
2. [Bug Fix][eITS-141200042] When the end of DST, the scheduling did not sync with the local time.
3. [Bug Fix][eITS-141200543] zConfig APP doesn't have FW check mechanism. When Mobile connects NBG6616 via APP, it always shows found the new firmware, and ask to upgrade.
4. [Bug Fix][ZQ40] If firmware version is the newest, zConfig APP still pop on "found new firmware, download it now?" message. If click "Ok", waiting about 2 minutes then the APP will close.
5. [Bug Fix][eITS-140200676] It shows the message ' \$ > < - \ # & | : "" ' , and can't save the settings when password is !@#\$1234 or !@#\$%^& and Dynamic DNS is set as Enable. It is no problem when Dynamic DNS is set as Disable.
6. [Bug Fix][ZQ37] Reset DUT to default setting and then change default WAN setting as (192.168.100.1 255.255.255.0 192.168.100.2), LAN IP would become 10.0.0.1.
7. [Bug Fix][eITS-141200042] Wi-Fi 2.4G and 5G both are disable/enable by scheduling but only 2.4G wakes up.

8. [FEATURE ENHANCEMENT] Update wifi driver version to be 10.2.2.83.
